revamp org chart

redundancy of

Org structure coming for approval

Doug young needs - information to take to legislators

Quantifiable information to provide to legislators

Provide - 10ish metrics

what do we need to measure that are important?

GIS at state level, statewide, cadastral standards, etc but also GIS within the state

Acknowledge the state of the

State level GIS

MGISAC - everything affects the different scales of members (State Agencies, Local government, federal agencies, higher education, industry) differently - MGISAC is a way to pull them together but they have different interests and needs at the different levels

The OGI plan is a living document so can be changed.

**Mission:** Improving Missouri with Geospatial Information

**Vision:** Foster cooperation among state, local, and federal agencies, educational institutions, private industry, and others in the field of geospatial technologies; provide guidance and oversight for the Missouri Spatial Data Information Service (MSDIS); develop, promote and review GIS related standards within the state; provide an arena for discussions of relevant geospatial issues within the state; provide expert advice to Missouri's leaders (e.g. Chief Information Officer (CIO), Geographic Information Officer (GIO), legislators, county

commissioners) and the Missouri geospatial community on geospatial related issues; coordinate and facilitate statewide outreach and advocacy activities; and collaborate with other states' organizations on geospatial issues.

Standards -- discussion -- including  
Historically -- what have we done. vs what could we be doing?
