

2011 Annual Plan Data Development Sub-committee

Lidar:

- Complete Business Plan for statewide Lidar
- Continue developing consortiums between federal state and local governments for specific areas, concentrate on FEMA identified areas.
- Continue working with SEMA to partner on acquisitions as a consortium member
- State Lidar repository at Washington University through MSDIS portal

Imagery:

- New State contract for use by local government.
- Determine requirements for 2012 NAIP with buy-up options for 4 band and ½ meter resolution if offered.

Structures:

- Continue working with RSOC's, MACOG on local maintenance
- Complete database for use by local data stewards
- Extend program to new area without USGS funding?
 - MSDIS and SEMA have developed templates and database, Homeland Security funding a possibility. Broadband mapping activities tie into this work as well.

NHD:

- Complete USGS funded pilot project updating NHD within state boundaries
- Determine whether to continue program, USGS funding available for one additional year
- MOU to make DNR permanent steward
- Develop NHD User Group
