

Missouri leaf-off imagery meeting notes
 April 16, 2013
 Jefferson City, MO

Attendees:

Jeff Schloss	OA		Paul Wright	OA
Arnold Williams	OA		Todd Comer	UM
Mark Duewell	MSDIS		Matt Gerike	Columbia
Debbie Briedwell	OA-SEMA		Andy Wagner	Maryland Heights
Tony Spicci	Conservation		Ted Stanton	St Louis Corps
Scott Zeller	SEMA		Jason Sheeley	Kansas City Corps
Drew Lane	National Guard		Eddie Whitworth	Camden County
Steve Marsh	MARC		Dale Schmutzler	SEMA
Greg Resz	Jefferson City		Nick Erlacker	Jefferson City
Jason Warzinik	Boone County		Melissa Johnson	Cole County
Patsy Alexander	Taney County		Ken Oliver	Camden County
Jennifer Reiman	East-West Gateway		Hanna Humphrey	DNR
Steve Hofferber	St Joseph		Jennifer Gardner	Camden County

Those shaded were not able to attend but will be kept on the mailing list. Others will be added as suggested.

Actions: Jeff and Paul to provide a link to the State Photogrammetric Mapping Products/Services RFP.

Completed: <http://oa.mo.gov/bids/b2z13036.htm>

Ray to contact the following communities and invite them to join this effort; Springfield, Branson, Joplin, Cape Girardeau, West Plains, Ft Wood. The 19 Regional Planning Commissions will also be contacted. Other suggestions include FAA 3" imagery over major airports, 6 – 12" for medium to small, and EPA.

Ray has received invitation to a future MACOG meeting.

All entities wishing to acquire 6" imagery to provide a shape file of their area with the year they prefer having it acquired to Ray. Please provide when able, this information is needed prior to submitting a task order to the contractors for bids.

Paul to contact SEMA Planning and Disaster Recovery on their interest in participating.

Arnold to contact DOT.

As the price for acquisition decreases for larger areas everyone looking for 6" resolution should contact their neighbors as to interest.

Meeting Notes:

- The state agencies are in favor of a one year acquisition if possible and are planning for 2015.
- Conservation and DNR would like ½ meter but are fine with 2' imagery.
- Projection agreed upon for statewide data is UTM. Do we need the entire state in zone 15 or in its proper zone (part of SE Missouri is in 16). DNR and Conservation prefers all in zone 15.
- MARC, Jackson County in particular, and Camden County prefer a 2014 flight.
- Once the Photogrammetric Services contract is let the contractors will be tasked with providing an estimate for complete 2' coverage.

- Should ½ meter coverage be cheaper or the same cost do we want to allow the contractors the option of providing a bid at that resolution? How this can be determined should be possible in a pre bid meeting. Those agencies funding the state wide contract outside higher resolution areas will need to decide.
- Options will be included to resample 6” imagery to the 2’ state coverage.
- Bids on providing 6” imagery to known areas will be requested.
- NGA areas of interest include areas of Kansas and Illinois. Option for these areas will also be needed if these areas are not included. Note: NGA estimates \$20 per square mile for their areas of interest (75-100K total for the three cities).

Other items:

While the meeting centered on using the Missouri Photogrammetric Services contract it is not in place yet, and is not the only option. The St Louis Corps of Engineers has Photogrammetric Services contract that has been successfully used and ensures quality data. The USGS also has a similar contract that can also be used.
