

Notes  
Missouri Statewide Imagery Meeting  
June 27, 2:00 PM

Attendees:

Name	Agency	Name	Agency
Ray Fox	USGS	Jeff Schloss	ITSD/GIS
Arnold Williams	ITSD/GIS	Mark Duewell	MSDIS
Tony Spicci	Conservation	Scott Zeller	SEMA
Steve Marsh	MARC	Greg Resz	Jefferson City
Jason Warzinik	Boone County	Patsy Alexander	Taney County
Steve Hofferber	St Joseph	Paul Wright	ITSD/GIS
Matt Gerike	Columbia	Dale Schmutzler	SEMA
Melissa Johnson	Cole County	Kimberly Hoke	DNR
Mike Dulan	USACE-KC		

ACTIONS:

1. Paul Wright to request 1/2 meter estimates for the state from all four contractors.
2. Ray to add Buchanan, Platte, Clay, Jackson, Cass, Camden, Butler, and Washington counties to six inch interest map.
  - a. Note: Butler and Washington are partial areas but do not have a shapefile of their area of interest.
3. Joe Carter to continue canvassing DOT on interest in state-wide contribution.
4. Steve, Jason, Mark, and Ray to begin work on developing plan of action.
  - a. Idea is to market the state contract to locals, emphasizing the cost savings of larger project areas.
5. Tony to send a call out to NSGIC asking for examples on how other states implemented state-wide programs.
6. Ray to provide a news item to Melissa for the MMA newsletter by July 8.
7. Unassigned action to contact Public Safety about support of this effort.

Agenda:

Review of state contract:

Review of areas saying they are interested in higher resolution

Ray provided list of all local communities that have contacted him. Without shapefiles  
Ray will include the entire county

Can we ask the four contractors to provide estimates?

Paul said yes we can and will begin the process.

MACOG suggested we ask for stateside six inch imagery quote and work towards that goal.

Not seen as practical although one foot may be more feasible.

Several regions need their imagery in 2014, how to accommodate?

Agreed that it isn't likely we will have funding to do the entire state in one year. Locals that need imagery in 14 will be encouraged to do so, program may be for 15 and 16, but 14 is a possibility.

Will the state agencies have adequate funding to fly all in one year?

Do not think so at this time but estimates will help make determination.

Building a state program:

Suggestion made that instead of a one year effort we develop a program whereby a region of the state is flown every year. This ensures continuity and local government can plan to have their region flown on a continual basis.

Consensus that while collecting the entire state in one year is desirable, it is doubtful that adequate funding will exist. Local governments have set requirements and may need to fly in certain years.

Will require a state champion, Directors of DNR and Conservation?

Kim said it's hard to budget for the out years. Others noted that without a champion in state government would be hard to pull off. Hopefully the study on what other states have done will add some interest but will be a challenge. Most agreed that it is needed but the path may be easier if the locals buy into coordinating on their own with the state filling in areas.

Marketing Plan: How to proceed?

Need two or three volunteers to develop a plan of action

Committee formed, Steve, Ray, Jason and Mark

MGISAC authorized \$5,000 to contract this out. Do we solicit bids, do it ourselves or engage the four contractors, maybe even pay them for the work?

Unresolved, need some estimates and plan of action before proceeding. What is needed is a project manager that can devote adequate time to this project.

Next meeting will be called once contractors have submitted their estimates. Suggestion made to invite them to the meeting to discuss their plans.

# Current status of six-inch areas

June 20, 2013

Missouri National Guard

Columbia

Cole, Callaway, Boone counties

Portion of Butler County (no shapefile)

Portion of Washington County (no shapefile)
